

Hi, I just wanted to make known my opposition to the consideration of instating LPFM radio, which with my current knowledge, it would literally wipe out my favorite radio stations local FM translators.

I just want to make known how critically important Air1 is to the community in which I live in as well as to me personally. I have been a faithful listener of this particular station and there is such a distinct contrast to the type of programming which is played today in the mainstream media. The fact that Air1 is also one of the few Christian stations still on the air makes it of paramount importance that such stations not be obliterated by other special interests who may happen to have the money or the influence to disrupt its operations.

To the entire nation's culture in general, after the various incidents and charges of indecency that you, the FCC, have placed on various television stations (Janet Jackson: Wardrobe malfunction) and Howard Stern, I believe it is obvious to maintain and protect these places of refuge that retain safe, positive, and family-oriented programming despite the fact that they may do better and make a profit conforming to the day to day programming we hear today. However, Air1 has always maintained a viewer supported agenda in which they do not run commercials or look for sponsors, but are maintained by dedicated, hard working individuals who are supported by their own listeners. It is a shining example of what the world should be, not run by profits but by the desire to do what is good in the world.

I truly hope that you put this through serious consideration. By enacting this new LPFM, you not only stifle small businesses or organizations who must spend money on new equipment or any new modifications to try to stay on the air, but you also include the uncertainty factor in which you may not be able to determine the type of programming that will be implemented in the replaced stations.

Thank you so much for asking for the public's opinion on this issue. It is a great way to get different viewpoints into the subject and I hope that you make the wisest decision you possibly can. Thanks again.
